

## Company Profile – Global Mobile Corp.

Global Mobile was incorporated in October 2007 after winning the WiMAX operator license for Taiwan. Global Mobile strives to become a world-class mobile broadband service provider, providing innovative and state-of-the-art telecommunication services to our customers. Our investors consist of content and WiMAX technology manufacturers who share the common vision in providing next generation mobility services with rich and intuitive content that is affordable for the masses.

Leveraging the advantage of a solid foundation of investors from Taiwan's leading media content providers, IC designer, electronics manufacturers, retail conglomerates etc., our experienced management team and business partners has strengthened Global Mobile's ability to speed the convergence of mobile telecommunication and Internet services. In addition, an alliance of more than 25 content providers in broadcasting, media and gaming industry was created to ensure the richness of our future offering.

Global Mobile is committed to provide "anytime, anywhere, any device" applications and service portfolio which will run on the nation's most advanced and reliable WiMAX network. Customers will experience a new mobile life style with enriched content and service offering that will bring convenience to life. Global Mobile will earn customers' trust and loyalty with our commitment to innovation, integrity, trustworthiness by creating a customer experience with the deployment of cutting-edge, reliable, high-quality products and a service oriented customer care framework.
